FCA Technologies LLC

FCA Technologies acquires Wise Point Solutions

FCA Technologies expands its horizons while deepening its credentials in the Real Estate industry

Falls Church, VA -- July 17, 2007 -- FCA Technologies announced today that it has acquired Wise Point Solutions, a growing business technology integrator and solution provider for the mortgage industry.

FCA Technologies provides innovative software and IT solutions for construction and real estate professionals by assisting companies in the greater Washington-Baltimore-Richmond area to implement Sage Timberline® Office and Sage Master Builder, a suite of integrated financial and operations software.

In announcing the acquisition, FCA Technologies President, Steve Rogers said, "We are really pleased to add Wise Point Solutions to our team. I've known Chris for several years and we have always had similar approaches to the way we conduct business and support our clients. Working with the mortgage industry is a natural complement to our expertise in the construction and real estate industries."

Chris Wise, Wise Point Solutions President added, "This is a good fit because FCA Technologies and Wise Point Solutions have the same philosophy; service is all about relationships. Our clients will now have a much larger team of people ready to support their IT and Mortgage software needs. With more people comes a greater knowledge base for support and with expanded security and technology offerings comes a higher comfort level."

About FCA Technologies LLC

Based in Falls Church, Virginia, FCA Technologies LLC provides software, consulting, and IT solutions for construction and real estate companies in the Mid Atlantic region.

The company provides all the software, hardware, and services necessary to design, configure, and implement complete computing solutions for general contractors, subcontractors, service contractors, home builders, real estate developers and real estate

managers.

In business since 1983, the company has accrued extensive knowledge of the industries it serves and the software products specifically designed for them. By being selective in its choice of software and network products it ensures the best fit for its clients. The company is a Business Partner for Sage Timberline Office, Sage Master Builder, Citrix, Microsoft, WatchGuard, Trend Micro and other outstanding software companies. See <http://www.fcatech.com>

About Wise Point Solutions:

Since 2000, WPS, located in the heart of Washington DC, has been helping mortgage companies improve efficiency and productivity by aligning mortgage technology with Business Operations. By understanding how technology drives and supports business decisions, the company provides cutting-edge technology integration solutions to the mortgage industry that demands higher returns on technology investments.
