

Yes, Converting Peachtree Data to Timberline is a Reality

Date: March 19, 2008

Press Release
FCA Technologies LLC

Yes, Converting Peachtree Data to Timberline is a Reality

FCA Technologies newest product, Peachtree Convert, will allow a new Sage Timberline® Office user to convert their old Peachtree data into Sage Timberline® Office.

You can now offer your Customers a conversion that will help your Customer become a happy Timberline User without that painful data entry which needlessly prolongs the conversion process.

With FCA Technologies' Peachtree Convert, your consultant will design the Timberline System just like always; the Customer will send the Peachtree directory to FCA Technologies to convert the Master Files and then the Transaction Files. Your Customer can insure a good conversion because they will be able to review and modify the information before it is imported into their new Timberline System.

We all know that one size doesn't fit all, so your Customer can decide what Master Files and Transaction Files they want to convert.

What Peachtree Master Files can your Customer convert?

Jobs, Cost Codes, Categories, Chart of Accounts, Vendors, Customers, Employees

What Peachtree Transaction Files can your Customer convert?

Job Cost Transactions, General Ledger Transactions plus the Ending Balances, Open AP & AR

Here is how the process works:

- The Customer's Timberline Consultant completes a questionnaire about key Timberline design decisions.
- Your Customer will send the Peachtree Data to FCA Technologies.
- One day later your Customer will be able to review their Peachtree master files via the Internet with specially designed tools that will speed their review.
- Within two days your Customer will have their Timberline directory populated with master files in their office. The Timberline Consultant can then prepare them to "Go Live".
- When the Customer's pre-Go Live month is reconciled in Peachtree, your Customer will send their Peachtree data and their Timberline data to FCA Technologies.
- Within two days your Customer will be completely converted. All their historical Peachtree transactions will be in Timberline.
